MEDICAL AID APPEAL

Dear Donor,

My son, **Baby of Pavar Sandip Popat**, born on **18/09/2026**, is currently undergoing treatment under the care of **Dr. Reena Lathi** at **Suyog Hospital, Nashik**. He has been diagnosed with **Preterm Birth, Very Low Birth Weight (VLBW)**, and **Large VSD (Ventricular Septal Defect – a hole in the heart)**.

HE REQUIRES SURGICAL INTERVENTION AND BED CHARGES WITH DIAGNOSTIC INVESTIGATION AND MEDICINES

DONATE NOW

YOUR CONTRIBUTION CAN CHANGE HIS LIFE!!

Following the doctor's Suggestion, we admitted our son at Suyog hospital. After many expensive tests, it was revealed that our son is suffering from **Preterm (VLBW) & LARGE VSD**. He needs supporting treatment costing. **Rs 3,50,000 (THREE LAKH FIFTY THOUSAND)**. Today he has suffered the risk of losing his life to this disease and as parents there is nothing, we are able to do to help our child.

HE HAS TO UNDERGO THIS TREATMENT

We can't afford **Rs. 3,50,000/-** to save our son life on our meager Income. As a last report, I am requesting you to rescue our **10 days** boy from this agony. His condition is getting worse every minute, and he may not have much time left with urgent supporting treatment. We have sold the little Jewellery we owned and now we are penniless. Without a treatment my son won't make it. Only you and your generosity can save this Child's life.

SPREADINGBLISS FOUNDATION is a national nonprofit organization dedicated to **Save Life of Children**. All donations to **SPREADINGBLISS FOUNDATION** are exempted from tax under section 80G of the Income Tax Act, 1961. Lastly You Can Make a Family Smile at The End of The Day.

To,

SPREADING BLISS FOUNDATION

Greetings from SUYOG HOSPITAL

This is to certify that **Baby of Pavar Sandip Popat – 2nd** Twin, 10 days old male baby weighing 800 grams, was admitted to Suyog Hospital NICU in a critical condition on 18/09/2026

The baby is an extremely premature, very low birth weight (VLBW) neonate with the following serious clinical conditions:

- Extreme prematurity
- Extremely low birth weight – 800 grams
- No spontaneous breathing at birth
- Cyanosis and severe respiratory distress
- Requirement of immediate mechanical ventilator support
- High risk of respiratory and other complications associated with extreme prematurity

Considering the baby's critical condition, immediate ventilator support was initiated. 2D Echocardiography was performed and showed large PDA (Patent Ductus Arteriosus) and large VSD (Ventricular Septal Defect), further increasing the baby's risk of respiratory and cardiac complications.

P.T.O

Due to the extremely low birth weight, extreme prematurity and significant cardiac defects, the baby requires continuous intensive NICU monitoring and prolonged treatment. The baby remains at high risk of complications such as respiratory failure, apnea, infections, feeding intolerance, hemodynamic instability and other complications related to extreme prematurity.

The baby requires:

- Continuous ventilator/respiratory support
- NICU monitoring and intensive care
- Surfactant therapy as clinically indicated
- Intravenous medications and supportive treatment
- Serial investigations and monitoring
- Cardiac monitoring and management of PDA/VSD
- Nutritional and fluid management
- Management of any complications arising during the NICU stay

The approximate total expenditure for the required NICU treatment, ventilator support, medicines, investigations, procedures and prolonged hospitalization is estimated up to ₹3,50,000/- (Rupees Three Lakh Fifty Thousand only), depending upon the baby's clinical course and duration of stay.

We sincerely request Spreading Bliss Foundation to extend financial assistance towards the treatment of this critically ill newborn.

Thank you for your valuable support and contribution towards saving a newborn life.
